# Message from the Managing Director

---

Welcome to Qimmat Al-Amoud Engineering Company, a leader in delivering integrated solutions across contracting, trading, advanced IT, telecommunications, oil and marine services, and public transportation. Since our founding, we have pursued excellence through innovation, quality, and a client-focused approach. Our diverse services reflect our vision to be a trusted strategic partner, executing projects efficiently while adhering to global best practices.

Our success is powered by the expertise of our people and our commitment to integrity, teamwork, and sustainable excellence. We value long-term relationships built on trust and transparency with every client and partner.

We look forward to creating successful and lasting partnerships, delivering solutions and services that exceed expectations.

With appreciation,

Mohammad Alwan Zaier  
Construction Company

# About US

The company was established in 2008 under Establishment Certificate No. (M Sh - 02 - 64435) dated May 29, 2008, corresponding to 24/05/1429 H, under the name “Al-Amoud Summit Engineering for General Contracting, Private Limited Company”, with a capital of 2,000,000 IQD (Two Million Iraqi Dinars).

The company’s management later amended its name and capital as follows:

On March 2, 2010, the company’s name and activities were amended by the owner’s decision to become:

“Qimmat Al-Amoud Engineering Company for Contracting, General Trading, Commercial Agencies, Advanced Information Technology, Telecommunications, Oil and Marine Services, and Public Transportation – Baghdad, Limited Liability Company.”

The company’s capital was last amended from 3,000,000,000 IQD (Three Billion Dinars) to 7,000,000,000 IQD (Seven Billion Dinars) pursuant to the letter issued by the Companies Registration Directorate No. (23516) on October 2, 2011.

The company’s capital is currently 7,000,000,000 IQD (Seven Billion Dinars), divided into 7,000,000,000 shares, each with a nominal value of 1 Iraqi Dinar, fully paid. Mr. Muhammad Alwan Zayer is the sole shareholder, owning all shares, and serves as the company’s Managing Director.

**The company holds a license for the sale, operation, installation, and maintenance of satellite communication terminal systems (VSAT), numbered 1900016 CMC BAS VSAT.**

## Our Vision

To achieve a distinguished position as a multi-disciplinary company, contributing effectively to economic development and infrastructure, through adherence to the highest standards of performance and corporate excellence.

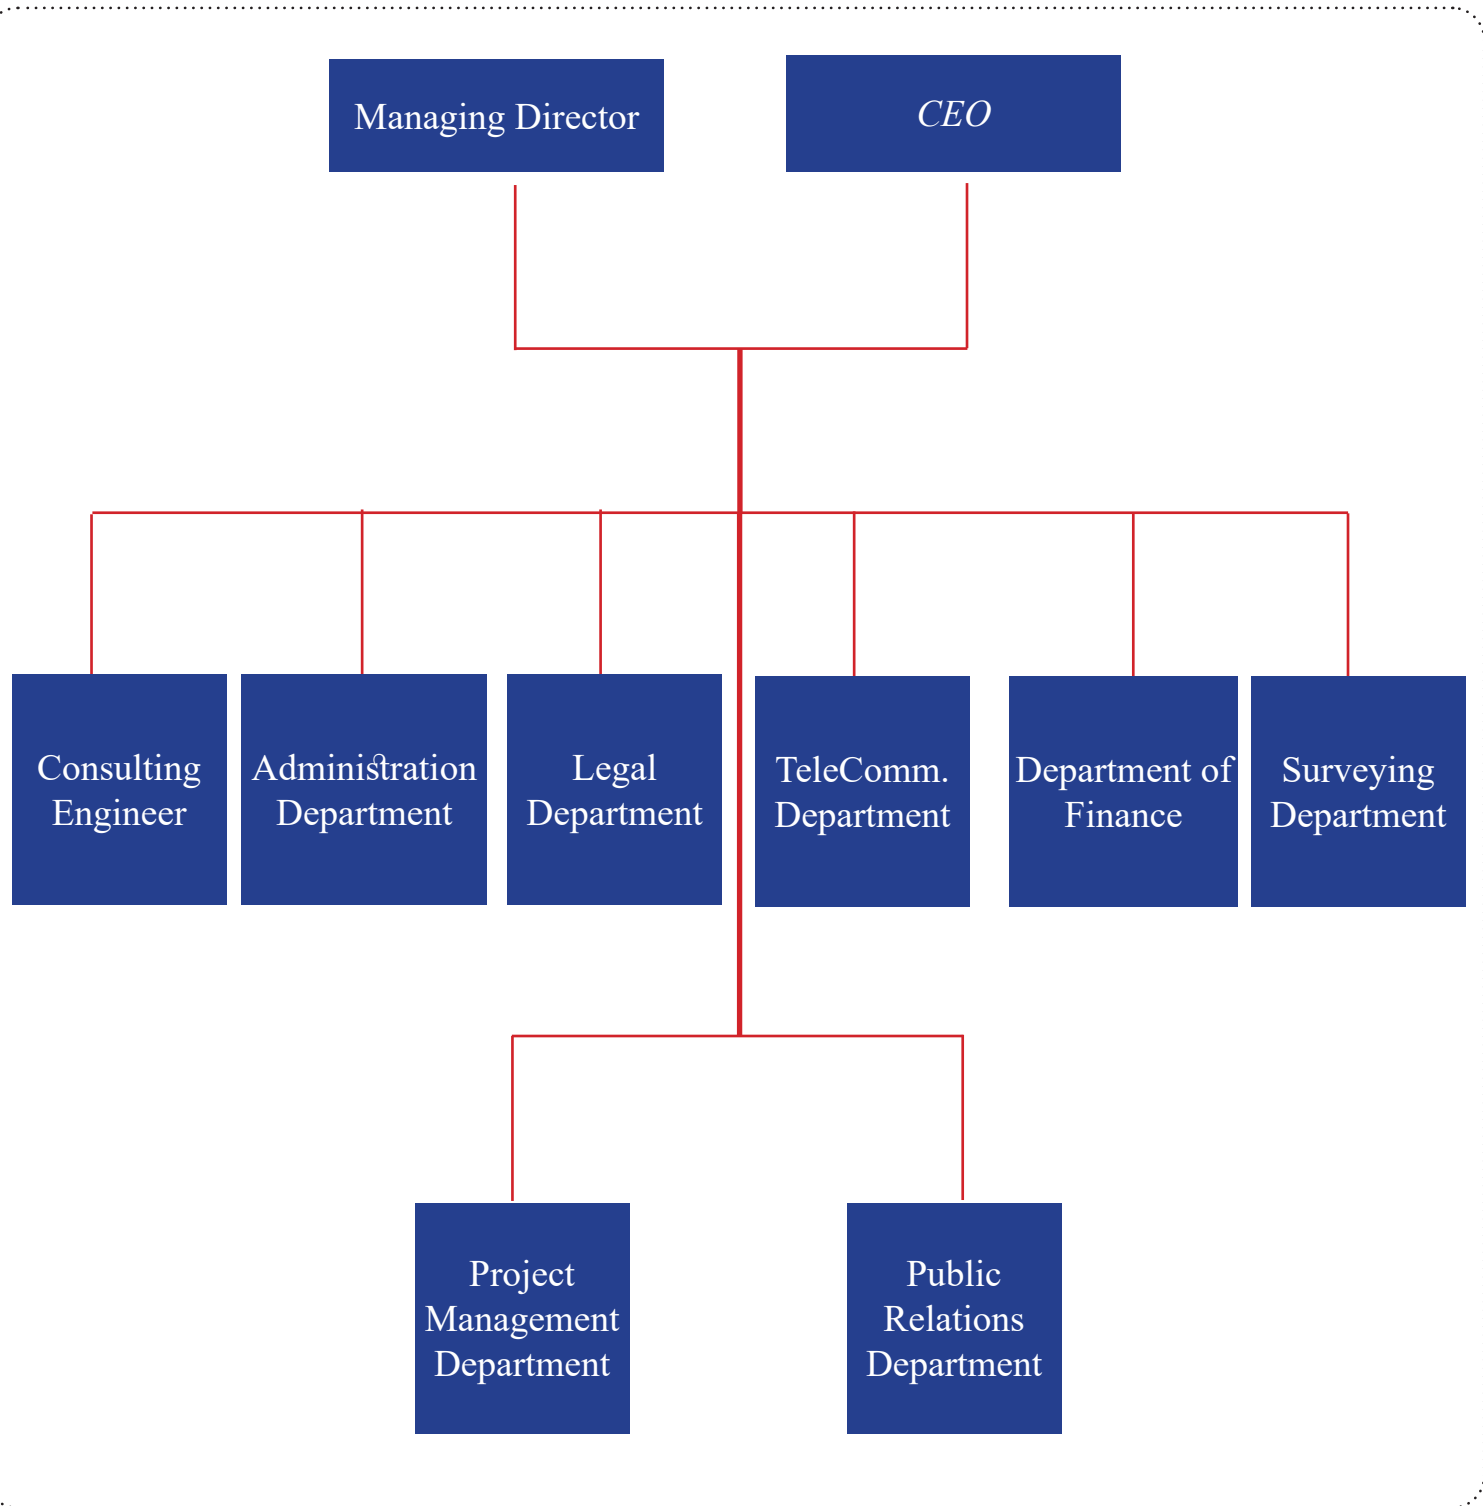

## Our Mission

To empower our clients to achieve their goals by providing professional and advanced services, supported by innovation, commitment, and quality across all areas of our business.

# Business Areas

**Oil Industry**

**General  
Contracting**

**General  
Trading**

**Public  
Transportation**

Marine Services

Telecommunications

Advanced  
Information  
Technology

1

## Oil Industry

Working in the oil sector encompasses engineering, technical, and administrative fields, and is considered one of the most important economic sectors in Iraq due to the employment opportunities and attractive salaries it provides.

This sector requires specialized skills, the ability to work in the field, and proficiency in English to achieve success and professional growth.

2

## General Contracting

Carrying out all contracting works, including activities related to the construction, expansion, and demolition of buildings of all types; the construction of roads, bridges, railways, airports, dams, reservoirs, irrigation and drainage projects, and ports; water and sewage works; installation and commissioning of machinery, equipment, telephone exchanges, and communication devices; HVAC works, plumbing and sanitary installations; earthworks and embankments, shoreline protection, and other construction activities; as well as all related electrical and mechanical works, and any other contracting works not specifically mentioned.

3

## General Trading

Wholesale, retail, supply, import, and export of all materials, goods, and commodities in accordance with applicable laws and regulations

4

## Public Transportation

Including land, sea, and air transportation for both passengers and goods

5

## Marine Services

Wholesale and retail trading, supply, import, and export of all materials, goods, and commodities in accordance with applicable laws and regulations

6

## Telecommunications

Provision of all types of general telecommunications works and services across all specializations, including international network (Internet) services, in accordance with applicable laws and regulations

7

## Advanced Information Technology

The company designs, installs, operates, and maintains computer software, information systems, advanced information technology solutions, applications, and internet networks. It also provides data transmission services—both public and private—between entities. In addition, the company organizes training and qualification programs for its staff as well as for personnel of governmental entities, institutions, and other companies, with the aim of developing and strengthening scientific, practical, and technical expertise related to this field
